

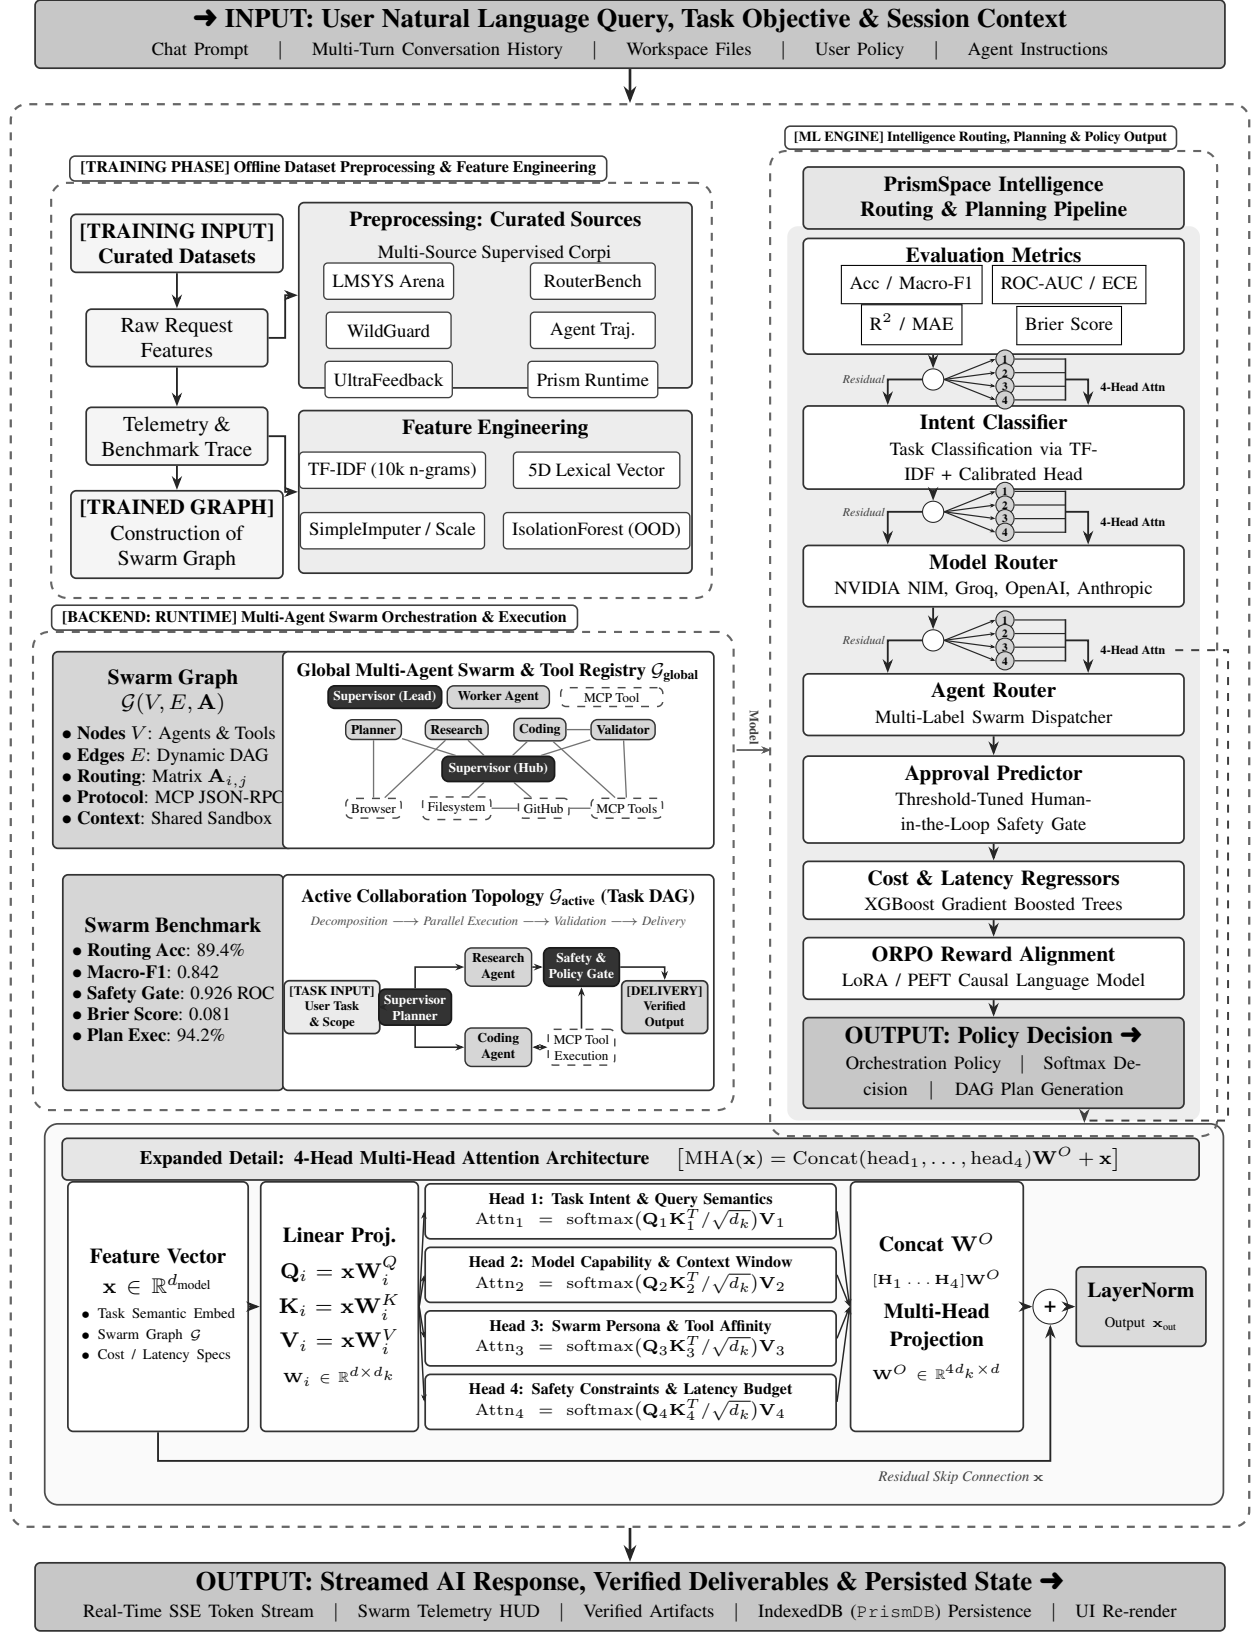

Figure 4.1: Framework of PrismSpace Multi-Agent System

Glossary of Terms & Abbreviations:

- **LMSYS**: Large Model Systems Organization (collaborative AI benchmark arena).
- **TF-IDF**: Term Frequency-Inverse Document Frequency (lexical feature extraction).
- **OOD**: Out-Of-Distribution (IsolationForest outlier/novelty detection).
- **DAG**: Directed Acyclic Graph (finite graph of execution dependencies without cycles).
- **MCP**: Model Context Protocol (open JSON-RPC standard for agent tool invocation).

- **ROC-AUC**: Area Under Receiver Operating Characteristic Curve.
- **ECE**: Expected Calibration Error (gap between confidence and real accuracy).
- **MHA**: Multi-Head Attention (parallel attention heads for distinct task aspects).
- **ORPO**: Odds Ratio Preference Optimization (reference-free preference alignment).
- **PEFT / LoRA**: Parameter-Efficient Fine-Tuning via Low-Rank Adaptation.
